Description The SGX7500E features a 14 HP EX40 Overhead Cam engine. User friendly control panel. GFCI (ground fault circuit interrupt) receptacles help ensure operator safety and are OSHA compliant. One 30 amp 120 volt twistlock and one 30 amp 120/240 volt twistlock receptacles are standard equipment. An AC circuit breaker automatically interrupts the current flowing through it when the current exceeds the trip rating of the breaker, protecting the generator from an overload. Large metal fuel tank provides extended run times between refills. The fuel strainer prevents debris from entering the tank. 12 volt, 18 AH battery is standard on SGX7500E. Operates at 76 dBA. Subaru provides a 3 year limited warranty on generator components with a 5 year limited warranty for the Subaru EX engine components.
